LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, January 1, 1916.

SIR: I have the honor to submit herewith for publication the thirty-eighth issue of the Statistical Abstract of the United States.

Respectfully,

E. E. PRATT,
Chief of Bureau.

TO HON. WILLIAM C. REDFIELD,
Secretary of Commerce.

EXPLANATORY NOTES.

The condensed statistics contained in this volume, unless otherwise stated in connection with the individual tables, represent, or are based upon, official figures collated and published under the various laws of the United States or those of other countries to which they may relate. The sources to which the various tables are credited will indicate where application should be made for additional details, with the exception that certain tables for which no credit appears are derived from regular reports of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and that Table No. 628 is derived largely from corresponding data presented for shorter periods in previous tables.

General imports.—Tables Nos. 238 and 239 embrace imported articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 245, 246, and 247, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import values.—All invoices of imported merchandise shall be made out in the currency of the place or country from whence the importations shall be made, or, if purchased, or agreed to be purchased, in the currency actually paid, agreed upon, or to be paid therefor, shall contain a correct, complete, and detailed description of such merchandise and of the packages, wrappings, or other coverings containing it, and shall be made in triplicate or in quadruplicate in case of merchandise intended for immediate transportation without appraisement, and signed by the person owning or shipping the same, if the merchandise has been actually purchased, or price agreed upon, fixed, or determined, or by the manufacturer or owner thereof, if the same has been procured otherwise than by purchase, or agreement of purchase, or by the duly authorized agent of such purchaser, seller, manufacturer, or owner.

All such invoices shall, at or before the shipment of the merchandise, be produced to the consular officer of the United States of the consular district in which the merchandise was manufactured, or purchased, or contracted to be delivered from, or when purchases or agreements for purchase are made in several places, in the consular district where the merchandise is assembled for shipment, as the case may be, for export to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, seller, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, or agreement for purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, or agreed to be purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by the act of October 3, 1913; and that no discounts, rebates, or commissions are contained in the invoice but such as have been actually allowed thereon, and that all drawbacks or bounties received or to be received are shown therein; and when obtained in any other manner than by purchase, or agreement of purchase, the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandise sold in the ordinary course of trade in the usual wholesale quantities, and that it includes all charges thereon as provided by the act of October 3, 1913, and the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced has been or will be furnished to anyone. If the merchandise was actually purchased, or agreed to be purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser or agreed to be paid, fixed, or determined.

Whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value

or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the seller, shipper, or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual article or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would be subjected if separately imported. The words "value," or "actual market value," or "wholesale price," whenever used in the act of October 3, 1913, or in any law relating to the appraisement of imported merchandise, shall be construed to be the actual market value or wholesale price of such or similar merchandise comparable in value therewith, as defined in that act. [Rev. Stats., 336, secs. 18 and 11 of the act of June 10, 1890, or other laws or regulations, as amended by act of Oct. 3, 1913. For full details regarding methods provided for ascertaining the actual "import" or "market" values in question (requirements and duties of sellers, purchasers, manufacturers, owners, agents, importers, shippers, consignors, consignees, consuls, collectors, appraisers, other persons, and production and consumption, fines, penalties, exactions, forfeitures, modifications, effect of decisions of courts of competent jurisdiction, etc.) see the complete act of 1913.]

Domestic exports.—Tables Nos. 240 and 241 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported. (Rev. Stat., 337, and act of Apr. 29, 1902.)

Foreign exports.—Table No. 242 called "foreign exports," or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Foreign merchandise in transit or transshipped.—Table No. 250 exhibits foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of the commodities returned in this table is determined in a similar manner to that of imports.

Warehoused merchandise.—Table No. 249 exhibits imported merchandise in warehouse. This merchandise has already appeared in the statements of *general imports*, Tables Nos. 240 and 241 for the year in which it was imported. The official values of the articles therein represented are the same as the *import values*.

Weights and measures.—The term "ton," as applied to weight, is specified "long" (2,240 pounds) or "short" (2,000 pounds). The term "ton," as applied to vessel measurement, is specified as "net," equal to 100 cubic feet of carrying capacity exclusive of deductions for space occupied by cabins, machinery, etc., or "gross," equal to 100 cubic feet of the entire carrying capacity inclusive of such space. The term "M feet" used in connection with the measure of lumber, etc., signifies 1,000 feet, board measure, a "foot" of such measure being 1 foot long, 1 foot wide, and 1 inch or less in thickness. "Cubic feet" or "cords," as applied to the measurement of lumber, pulp wood, etc., signifies cubic contents. According to section 3249, Revised Statutes, "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of 0.7939 at 60° Fahrenheit." The official gallon prescribed is one containing 231 cubic inches, or 58,372.2 grains, equal to 8.3389 pounds of distilled water at its maximum density, weighed in air of a temperature of 62° Fahrenheit and barometric pressure of 30 inches. The taxable gallon differs from the proof gallon by reason of the fact that in computing taxable gallons under section 3251, Revised Statutes, all fractional parts of a gallon less than one-tenth are excluded.

¹ In the States not enumerated the land areas were all appropriated in the years mentioned.² The unappropriated lands in Alaska are not included herein. The total area of Alaska is 378,165,760 acres, of which about 20,808,000 acres are reserved. Approximately 300,000 acres have been surveyed under the rectangular system within the past five years.³ In public land strip.⁴ Exclusive of Ohio, Indiana, and Illinois, in which, if any public land remains, it consists of a few small, isolated tracts; it is exclusive of the Cherokee Strip, containing 8,044,644 acres, and all other lands owned or claimed by the Indians in the Indian Territory west of the ninety-sixth degree of longitude.

No. 21.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1910: BY STATES.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[NOTE.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900 and 1910, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

¹ The figures relate to United States public schools outside of incorporated towns only, and, for years subsequent to 1905, to public schools for native children only. By the act of Jan. 27, 1905, the management of the schools for white children outside of incorporated towns devolved upon the governor of Alaska as ex officio superintendent of public instruction, the native schools being left under the jurisdiction of the Bureau of Education.

² Includes salaries, equipment, supplies, travel, freight, fuel, light, repairs, local expenses, and janitor services.

³ No data.

⁴ Salaries of 50 employees in Alaska.

¹ Accurate data for years subsequent to 1904-5; estimates for prior years.

² "Schools," as here used, synonymous with "classroom." Rooms with a double enrollment—one class in the morning, another in the afternoon—counted as two. Figures for years subsequent to 1905-6 give the average number of schools open; figures for prior years, the whole number of schools open at any time during the year.

³ For years subsequent to 1904-5, number of teachers employed at the end of the school year.

⁴ For years preceding 1905, number of Porto Rican teachers only.

⁵ No data.

⁶ The total enrollment is given as 70,216; for the common schools, 64,039. As these figures include an unknown number of reenrollments they would not be comparable with the data for other years.

¹ Population of incorporated places having 2,500 or more inhabitants in 1910. The figure for 1900 does not represent the urban population according to that census, but denotes the population in that year of the territory classified as urban in 1910.

² Total, exclusive of urban. (See note 1.)

³ While the drainage of lakes and swamps in Illinois and Indiana caused some increase in total area between 1900 and 1910, the building of the Roosevelt and Laguna Reservoirs and the formation of the Salton Sea in California resulted in a net decrease of total acreage as indicated.

⁴ Decrease.

¹ A minus sign (—) denotes decrease.

² Acreage reports for miscellaneous seeds were consolidated with those for minor field crops in 1909.

³ Several crops or farm products for which the Census Bureau has no separate acreage reports yielded considerable returns. The acreage of cotton seed, if separately reported, would be a duplication of the acreage of cotton; that of grass seed, of hay and forage crops; and that of vegetable and flower seeds, of vegetables and of flowers and plants. Such products as flax fiber, flax straw, other straw, and cornstalks and leaves come from the acreage reported under cereals. No acreage could be given for the maple sugar and sirup or forest products. The number of trees of bearing age and the number not of bearing age were thought to be more satisfactory as a measure of the extent of the fruit and nut industry than acreage, and, therefore, acreage reports are not shown except for small fruits.

¹ The act of Congress approved Apr. 30, 1912, authorized the Bureau of the Census to collect statistics of leaf tobacco held on Apr. 1 and Oct. 1 of each year. It provided that a report should be secured from each manufacturer of tobacco who, according to the returns of the Commissioner of Internal Revenue, manufactured during the preceding calendar year more than 50,000 pounds of tobacco; from each manufacturer of cigars who manufactured more than 250,000 cigars; from each manufacturer of cigarettes who manufactured more than 1,000,000 cigarettes; and from each dealer in leaf tobacco who, on an average, had more than 50,000 pounds of leaf tobacco in stock at the ends of the four quarters of the preceding calendar year. The first report made under the provisions of this law was of leaf tobacco held on Oct. 1, 1912, and statistics have been collected regularly since that date.

¹ In tons of 2,240 pounds.

² Includes spiegeleisen, ferromanganese, ferrosilicon, ferrophosphorus, ferrotitanium, ferrovanadium, etc.

³ Colorado includes Missouri; Washington is also included from 1900; California is included from 1907; and Oregon from 1911.

⁴ Massachusetts and Connecticut combined after 1904.

⁵ Georgia includes North Carolina and Texas prior to 1904 and Texas only from 1904 to 1911.

⁶ Indiana and Michigan combined after 1906.

⁷ Kentucky includes Mississippi in 1913 and West Virginia from 1913 to date.

⁸ Wisconsin includes Minnesota.

⁹ New Jersey includes New York from 1913 to date.

¹⁰ New England and Middle States: Connecticut, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, and West Virginia. Southern States: Alabama, Georgia, Kentucky, Mississippi, North Carolina, Tennessee, Texas, and Virginia. Western States: Colorado, Illinois, Indiana, Michigan, Minnesota, Missouri, Ohio, and Wisconsin. Pacific States: Oregon, Washington, and California. (The production of the Pacific States is included with that of Colorado.)

¹ The reports from which this table is made up are rendered at different dates, the average of which is about June, 1915. In a few cases, where the company owns a large number of service cars compared with the number of passenger cars owned, the total number of such service cars has been omitted. In the case of the electrified steam trunk lines only electric locomotives, motor passenger cars, and trail passenger cars for use with the multiple-unit system, have been included.

¹The figures given for the years ended June 30, 1909 to 1912, are not fully comparable with those shown for previous years, chiefly for the reason that they do not include data for roads classed as switching and terminal.

²Excludes returns for so-called small roads (having operating revenues below \$100,000 for the year) and returns for switching and terminal companies.

³Figures include an apportionment of unclassified tonnage.

⁴Includes 25 per cent of the total mileage of revenue mixed trains.

⁵For the years 1890 and 1895, 25 per cent of the mixed-train mileage was apportioned to passenger-train mileage and 75 per cent to freight-train mileage; but in computations for subsequent years the total mixed-train mileage was used both with passenger-train mileage and with freight-train mileage.

⁶Includes 75 per cent of the total mileage of revenue mixed trains.

⁷Includes a small amount of special-train mileage not separately reported prior to 1909.

⁸Includes a small amount of unclassified train mileage; also a small amount of special-train mileage not separately reported prior to 1909.

¹ During the first six months of the year 1914 rates paid on grain, flour, and provisions were quite low as compared with previous years; the European war, however, shortly after the beginning of hostilities, created a tremendous demand for tonnage and forced rates to the highest level known to this generation of shippers. Complete statements of freight averages for 1914 and 1915 are therefore impossible.

¹ Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt, and peas.² Receipts at New York, Portland, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.³ Data not available after 1907.

No. 233.—VESSELS ENTERED AT AND CLEARED FROM SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: TONNAGE, 1891 TO 1915, BY COUNTRIES.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

¹See also prior table of "Merchandise imported into and exported from the United States, and excess of imports or exports, by countries," p. 358.

²The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

¹ The production is of the calendar year preceding the fiscal year, the figures being those of the U. S. Department of Agriculture. ² Including corn meal reduced to corn at rate of 4 bushels to barrel.

³ The figures include for years prior to 1910 net imports of corn and imports of corn meal for consumption; for 1910 and subsequent years all figures represent imports for consumption. Small amounts of burnt or roasted corn in 1898, 1899, and 1900 are omitted. ⁴ Average for the period.

⁵ Data relate to U. S. as a whole. Production (if any) for noncontiguous territory is lacking.

¹ Production statistics relate, when possible, to year of growth, but when figures for growth year are wanting, those for a commercial crop which represents the trade movement have been taken. Statistics of production for 1862-1898, inclusive, have been compiled from publications of the United States Department of Agriculture; for 1899 to date census figures are used.

² For 1910 to date the price per pound shown for upland cotton represents the average price received for cotton by growers as computed by the Department of Agriculture; for 1902-1909 it is the average price of the average grade marketed in New Orleans prior to Apr. 1 of the following year; for 1890-1901, inclusive, it is the average price of middling cotton on the New Orleans Cotton Exchange; and for 1862-1889, inclusive, it is taken from reports of the United States Department of Agriculture.

³ Statistics of consumption for 1862-1894, inclusive, have been compiled from publications of the United States Department of Agriculture, and those for 1895-1903, inclusive, from the reports of Latham, Alexander & Co.. Census figures are used for 1904 to date. The statistics relate to the 12 months during which the crop of the specified year was chiefly marketed, and not to the calendar year specified.

⁴ Figures are those of the Bureau of Foreign and Domestic Commerce; prior to 1866 they relate to the year beginning July 1; 1866, 14 months, beginning July 1; 1867-1913, year beginning Sept. 1; 1914, year beginning Aug. 1. Statistics for the month of August, 1913, are therefore included in each of the years 1913 and 1914.

²After 1900 includes imports into continental United States and shipments thereto from noncontiguous customs districts.

³After 1900 includes exports, domestic and foreign, from continental United States and shipments therefrom to noncontiguous customs districts.

⁴Average for the period.

⁵Import prices for 1891 and 1892 were overvalued by reason of depreciation of Brazilian paper milreis.

⁶Information for 1901 and 1902 relative to noncontiguous customs districts is somewhat fragmentary.

No. 281.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: QUANTITIES CONSUMED AND ANNUAL CONSUMPTION PER CAPITA IN THE UNITED STATES, 1850 TO 1915.¹

[Source: The production of domestic wines has been estimated by the Department of Agriculture, by Mr. Charles McK. Leoser, president of the Wine & Spirit Traders' Society of New York, and other well-informed persons. The production of domestic spirits and malt liquors has been derived from reports of the Commissioner of Internal Revenue. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax. For 1915 these amounts were 2,324,021 and 25,411,719 tax gallons, respectively.]

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

¹ The price on board fixed at Baltimore by the Seaboard Coal Association.

² Price of soft-coal pool.

³ Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price. Clearfield coal selling as high as \$7 at the mines and as high as \$9 in New York Harbor. Unsettled conditions lasted until Mar. 1, 1903, or nearly so; then, on Apr. 1, prices were made \$3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.

⁴ Shipments nominal. No sales made after 1903.

⁵ Cumberland coal now includes "thin seam" as well as "big vein" coal, the former selling about 25 cents per ton lower than the latter.

⁶ Freight on "big vein" coal to Baltimore having been reduced 15 cents, \$2.60 in 1909 and subsequent years is equivalent to \$2.75 in 1908 and previous years.

⁷ Nominal; includes State tax of 10 cents per ton in 1913.

No. 300.—RELATIVE RETAIL PRICE OF COAL IN TON LOTS FOR HOUSEHOLD USE ON JAN. 15, 1907 TO 1915, BY KINDS OF COAL AND BY GEOGRAPHIC DIVISIONS.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. This table compares the average price of coal on Jan. 15 each year, 1907 to 1915, with the average price for 1914. The average price for 1914 was found by dividing the sum of the prices on Jan. 15, Apr. 15, July 15, and Oct. 15, by 4. Statements of prices were furnished by 168 coal dealers in 35 cities during the period from 1908 to 1911. Other dealers were added during 1912, bringing the number up to approximately 200. The cities included, with few exceptions, are the same as those from which retail prices of food were secured. Average price for 1914=100.]

¹ This table has been revised and shows slight changes from previous figures in some of the items.

² \$12,445,564 in gold coin and \$92,365,800 in gold certificates was held by Federal reserve banks and Federal reserve agents against Federal reserve notes, July 1, 1915.
³ For redemption of outstanding certificates an exact equivalent in amount of the appropriate kind of money is held in the Treasury, and is not included in the account of money held as assets of the Government. Gold coin became available for circulation Jan. 1, 1879, as a result of the resumption act of Jan. 14, 1875. Silver certificates were authorized by acts of Feb. 28, 1878, and Aug. 4, 1886.

⁴ Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of Jan. 14, 1875.
⁵ As the result of special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

⁶ The Director of the Mint made a revised estimate of the stock of subsidiary silver coin Sept. 1, 1910; as a consequence of such revision there was a reduction of \$9,700,000.

Excess of repayments over disbursements.

² Expenses of cotton-boll weevil investigation not included after 1914.

^a Decrease largely due to transfer of employees of Forest Service (\$2,318,000) from the lump-sum appropriation for General Expenses, Forest Service, to the statutory roll, "Salaries," Department of Agriculture.

⁴ See note 3.

⁵Department of Commerce and Labor prior to Mar. 4, 1913, when the Department of Labor was created.

^cIncludes all expenditures made during the fiscal year 1913 for bureaus and offices transferred to the Department of Labor, created Mar. 4, 1913.

¹ The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, expenses of detecting and punishing violations of internal-revenue laws, and expenses of collecting the corporation tax.

² The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

³ Includes corporation tax, as follows: 1910, \$20,951,780.97; 1911, \$33,516,976.59; 1912, \$28,583,303.73; 1913, \$35,006,299.84; 1914 includes \$10,671,077.22 corporation excise tax, \$32,456,662.67 corporation income tax, and \$28,253,534.85 individual income tax.

⁴ Includes \$52,069,126.29 emergency revenue; \$39,135,596.77 corporation income tax; \$41,046,162.09 individual income tax.

¹ The law provides for a tax on wine made in imitation of champagne, etc., but no internal revenue was derived from the same during the fiscal years 1884-1898. The amounts thus received in some of the subsequent years are so small as to be negligible in this or the table following, except in 1903, when they amounted to nearly \$700, included under distilled spirits as \$1,000.

² From 1884 to 1890, inclusive, year ended Apr. 30.

³ Fourteen months ended June 30.

¹ These figures are furnished by the Post Office Department.

² Presidential appointees under "Interior Department, miscellaneous," are the recorder of deeds, register of wills, inspector of gas and meters, and Superintendent of Capitol Building and Grounds.

³ Under "Presidential Justice," are 16 department officers; 30 commissioners of deeds, 800 notaries, and 16 trustees of reform schools.

⁴ It has not been found practicable to separate the employees in the Department of Labor from those in the Department of Commerce.

⁵ An act to create the Coast Guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service declared that the employees should constitute a part of the military forces of the United States.

⁶ 242 presidential appointments heretofore carried under "Treasury, miscellaneous," are revenue-cutter officers, and omitted from this table, being a part of the military service.

⁷ The total number of mechanical trades positions is estimated at 20,000, of which about one-fifth are those of unskilled laborers. The number appointed was 12,041, and the figures are based on these data.

⁸ These positions are in the post office inspection service.

⁹ The 8,950 positions in the presidential column are those of postmasters.

¹ Includes clerks and carriers at classified post offices, rural carriers, and fourth-class postmasters.

² Data not available.

³ On account of the abundance of eligibles remaining from the previous year, but few examinations were held; percentage upon the basis of these figures would therefore be deceptive.

⁴ Residents of several States were considered provisionally eligible at 60 per cent.

† Calendar years.

⁷ Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

⁸ Total specie in circulation; gold and silver were not separately stated prior to 1876. ⁹ Estimated.

¹⁰ As the result of special investigation by the Director of the Mint a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,700,000 was made in the estimate of silver coin.

* Statistics of national banks are as of reports nearest to June 30 of each year. Those of other banks combine reports of various dates within the year.

¹ From 1896 to 1903, inclusive, includes Illinois State banks having savings departments.

² Includes all private banks from 1875 to 1882; from 1887 to date includes only those voluntarily reporting, estimated at one-fourth of total private banks.

³ "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "Miscellaneous" but do not include receipts from loans, premiums, or Treasury notes, or revenues of Post Office Department. The figures cover actual receipts as of Treasury accounts.

⁴ Actual collections on account of duties and tonnage tax.

⁵ No data.

⁴ Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

⁵ 1821: no complete data for 1820 or earlier years.

¹ The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

¹ Prior to 1875 the customs district of Texas.² The statistics since 1913 represent the commerce of the districts named in the boxhead as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

* Calendar years.

† The production statistics are exclusive of linters and relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

¹ Cleaned rice; 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

§ 1825.

|| July 31, 1834, to Dec. 31, 1844.

¶ 1845 to 1849.

‖ Product of 1845.

‗ Equivalent baies of 400 pounds.

18 Mean annual production not exceeding quantity stated.

14 After 1903 the figures represent consumption. Those for 1911 and subsequent years do not include imported leaf aluminum and miscellaneous manufactures of aluminum.

¹ The figures relate only to establishments which operate blast furnaces, steel works, and rolling mills, and forges and bloomeries.² The figures are those of the Bureau of the Census and cover census years, which as regards manufactures are calendar years preceding those in which the censuses were taken. For explanation of cases of disagreement with other tables of manufactures in this volume, due to variation in branches of industry covered, see census reports.⁴ Marketed.⁵ Of 75 pounds net.⁶ Includes custom work and repairing.⁶ Of 280 pounds net.

¹ The figures are those of the Bureau of the Census and cover census years which, as regards manufactures, are calendar years preceding those in which the censuses were taken. For explanation of cases of disagreement with other tables of manufactures in this volume, due to variation in branches of industry covered, see census reports.

² Includes custom work and repairing.

^a Exclusive of fast freight line service.

^b Overvalued by reason of depreciation of Brazilian paper milreis.

^c Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.

^d Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.

^e Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, 1913 to date, except for "miles in operation," the mileage of so-called small roads having operating revenues below \$100,000 for the year.

¹ Includes gold, silver, and other coin.

² "Specie" includes subsidiary coin in banks.

³ Estimates for the United Kingdom prior to 1910 were for coin only; these figures include \$100,000,000 for bullion in banks.

⁴ Based on estimate of active rupee circulation by Accountant General of India in 1908.

⁵ Includes Straits Settlements, Malay States, and Johore.

⁶ Based upon a calculation by Messrs. P. Arminjon and B. Michel in 1908, who then estimated the stock of gold at 33,000,000 to 41,000,000 Egyptian pounds. The mean of these figures was adopted. Since then the net imports of Egypt, by customs records, have been \$50,000,000, but the 1908 estimate has been changed only to the extent of the increase in bank holdings. It does not seem probable that Egypt can have absorbed the amount of gold indicated by the customs records.

⁷ Estimate of A. De Forville, 1909. Silver for 1912 repeated for 1913.

⁸ The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1913 the Reichsbank held \$114,573,080 in bullion and foreign coin.

NOTE.—The blank spaces in this table signify that no satisfactory information is available. The data shown above have been gathered from various reliable sources. However, it is not complete or satisfactory, but is the best obtainable at this time. In some instances the amount of gold in banks and public treasuries is carried out as the total stock in one country, although an unknown amount is in circulation. The case of Italy is an example of this. The per capita circulation is based upon known amounts only. All estimates for stock of money in circulation must be accepted with reserve.

account of the Port Augusta-Oodnadatta Railway; war loan from the United Kingdom, £14,842,105. The net debt of the States aggregated £288,607,635, there being various sinking funds on hand totalling £5,764,851.

New Zealand.—The revenues and expenditures stated were on account of the consolidated fund only. The net amount of public debt on Mar. 31, 1915, was £96,644,455, there being various sinking funds on hand totalling £3,178,055.

France.—The public-debt charges include pensions, annuities, etc., comprised under the general caption of "rente viagère" amounting to 340,431,880 francs in 1914.

French colonies, n. e. s.—Budget figures are exclusive of the net expenditures of the mother country on account of the colonies.

German Empire.—The figures of debt represent the obligations of the Empire on Mar. 31, 1913. The subscriptions to the first three war loans are reported to have totaled 25,621 million marks.

German States.—The revenues appearing in the table are exclusive of transfers (Überweisungen) but inclusive of compensatory payments (Vergütungen) from the Imperial treasury; expenditures are exclusive of materialbeiträge.

German colonies.—The revenues are exclusive of 29,312,000 marks subsidy from the Imperial treasury.

Greece.—The unfunded debt includes 60,949,315 drachmas of paper money in circulation.

British India.—In addition to the budget estimates as given, the amount of capital expenditure on State railways and irrigation works in 1914-15 was estimated at £11,833,000, and the sum of £363,400 was to be expended on the new capital at Delhi.

Italy.—The funded debt, given as per date June 30, 1913, represents the consolidated and perpetual debt. The unfunded debt is made up of 4,234,480,824 lire of the redeemable debt, 491,629,075 lire of treasury bills in circulation, 287,035,000 lire of treasury bonds, and 71,107,847 lire of interest-bearing current accounts. On the above date the Treasury was reported to hold 1,337,166,543 lire of the public-debt securities, thus reducing the net debt outstanding to 13,798,338,651 lire.

Paraguay.—The figures of the debt, given as per date of Apr. 30, 1915, include £440,326.82 issued as part of the loan for £1,250,000, authorized by the law of Nov. 28, 1912, the contract for which was signed Jan. 30, 1914. The unfunded debt includes 115,000,000 pesos of paper and nickel money in circulation. The paper peso was worth about 4 cents at the end of 1914, and about 2.35 cents at the end of 1915.

Brazil.—The items under funded debt represent the consolidated debt, external and internal. The three items under unfunded debt represent, respectively: The external floating debt (treasury bonds amortizable in August); the interior floating debt; and paper money in circulation. The above debt is exclusive of "accounts payable by the Treasury," estimated at between 60,000 and 70,000 contos. At the end of 1913, the debts of the several States totaled 1,120,990 contos of reis or \$363,657,323, or \$112,439,170.

Bulgaria.—Against the total debt outstanding the Government holds assets amounting to 86,373,616 francs. The net debt therefore amounts to 828,407,367 francs.

Canada.—The receipts and expenditures stated were on account of the consolidated fund only. The expenditures for railways, canals, and public works amounted to \$37,180,175, railway subsidies to \$19,036,236, and other charges to \$143,652, making the total expenditures for the year equal to \$159,744,555. The total gross debt of the Dominion on Mar. 31, 1914, stood at \$544,391,000, against which the Government held assets amounting to \$208,394,000, including sinking funds to the amount of \$9,144,994. The net debt amounted to \$335,996,850.

Honduras.—Of the total external debt stated by the Council of the Corporation of Foreign Bondholders, £24,944,493, arrears of interest since 1872 constitute £19,545,923.

Panama.—The figures of revenue and expenditure represent one-half of the biennial budget for 1915 and 1916.

China.—The figures of revenue and expenditure appearing in the table are those of the Imperial revenues from all sources, estimated at 145,890,000 taikwan taels.

Denmark.—Against the total debt the assets of the State are given as 844,505,862 kroner, of which 301,519,069 kroner represent the value of the State railways.

Egypt.—Against the total debt the "Caisse de la dette publique" and the Government held bonds amounting to £5,459,920, reducing thus the net debt outstanding to £88,742,620. The interest charges include £2,665,041 paid as tribute to Turkey. The Egyptian pound is equivalent to \$4.93.

Portugal.—Of the total gross debt the Government is reported to hold £59,300,234. The cash held by the Government on June 30, 1914, totaled 5,121,447 escudos. No account taken of exchange.

Russia.—The total debt is exclusive of 5,010,823,000 rubles of credit notes of the Imperial Bank in circulation on Oct. 16 (29), 1915, partly covered by the gold reserve of the bank. At the end of October, 1915, there were due to depositors of the Government savings banks 2,830,000,000 rubles. The Government is also liable for the mortgage bonds issued by the Governmental Noblemen's and Peasants' Land Banks.

Sum.—In addition to the total for the public debt above stated there were in circulation at the end of March, 1914, 28,707,600 ticals of paper money. Thirteen ticals are equivalent to £1 sterling.

United Kingdom.—The British budget figures are made up of gross exchequer receipts and issues; the latter exclusive of £4,293,000 made to meet capital expenditure. The assets of the British exchequer on Mar. 31, 1915, were composed of £29,983,000, estimated value of Suez Canal shares; £3,242,906 other assets, and £83,450,952 bank balances.

United States.—The total receipts include the ordinary receipts, \$697,910,828; public-debt receipts, \$22,486,955; and the postal revenues, \$287,248,165. The total disbursements include the ordinary disbursements, \$731,399,759 (inclusive of the postal deficit of \$6,636,593); Panama Canal disbursements, \$29,187,042; public debt disbursements, \$17,253,491; and disbursements on account of the Postal Service, \$287,248,165. The item in the column "funded debt" is the total interest-bearing debt of the United States under date of July 1, 1915. The remainder represents all other indebtedness of the United States less cash in the Treasury on that date.

Philippine Islands.—The total of the funded debt is exclusive of the municipal debts of the cities of Manila and Cebu, amounting to \$4,000,000 and \$125,000, respectively.
